**Freedom of Information Act Request
Number: EPA-R7-2014-008953**

Dear Mr. Anderson:

This is the second and final response to your July 29, 2014, request for information regarding recorded sampling for alpha, beta, and gamma radiation at the air monitoring stations for the West Lake Superfund Site in Bridgeton, Missouri.

You may access the additional records responsive to your request at the following URL:
<https://foiaonline.regulations.gov:443/foia/action/public/view/request/80307338>

The uploaded data is comprised of laboratory analytical generated data gathered at five locations in the community around the West Lake Landfill in Bridgeton, Missouri. Sampling data includes radiation dosimetry collected monthly for radiation exposure. It does not include a much larger data set of field capable monitoring equipment also at these same locations measuring various parameters, as this would have cost more than your assurance of payment under this FOIA request. Locations of the five off-site monitoring areas can be found in the Quality Assurance Project Plan for Baseline Offsite Air Monitoring and Sampling, West Lake Landfill Site, Bridgeton, Missouri as well as on EPA's West Lake information page on the internet, (http://www.epa.gov/region07/cleanup/west_lake_landfill/).

This monitoring effort is to measure and identify normal variations of background radiological constituents in order to understand variabilities before any construction begins at the West Lake Landfill Site. The enclosed data reports contain data qualifiers and their definitions.

You may appeal this response to the National Freedom of Information Officer, U.S. EPA, FOIA and Privacy Branch, 1200 Pennsylvania Avenue, N.W.
